Constant Torque Hinged Accessory Post **“AC-CTH”**

It's taken over two years but we finally have a solution for the Clipboard/Desk and Electronic Device mounting.

The AC-CTH mounts on any of our accessory track and more specifically the accessory track on the Hinged Adjustable Armrest.

The AC-CTH slides into the track and has our standard friction lock so you can adjust height if needed and securely attach the Clipboard/Desk or Device.

The AC-CTH has constant torque throughout its full range of motion. That means you can move your Clipboard/Desk or Device to any position and it will stay in position. Simple one-handed operation, Pull UP or Push Down to adjust the position. No locks or levers to fool with.

The AC-CTH allows the convenience of using the Clipboard/Desk or Device without the need to remove it. If you need to switch tanks, adjust trim or cowl flaps, simply Push Down and everything is easily accessible. Then simply return it to any position you want.

The AC-CTH works in conjunction with our device mounting plates and can support up to 4lbs. If your looking for the perfect place to mount your GPS or small tablet PC this is it.

We can fabricate device mounting plates to fit the Garmin 195, 196, 296, and 396, Lowrance 1000, 2000, Flight Cheetah, Table PC's or any electronic device.

Call 330-669-9099 or email Information@Saircorp.com for details or to place an order.
